## AIR CONDITIONING PARKING COOLER

Air conditioning equipment of the line Agromax are a new air conditioning system electric specially designed for machines Agricultural. Ideal for working in extreme climates with the demands that the field requires.

PARK COOLER equipment for agriculture has a special finned condenser separated with a pre-filter that prevents particles and seeds get stuck in the condenser preventing the system work at higher pressures, favoring the useful life of equipment.

These equipment work completely independently of the engine and can be used, both with the engine running, like a stationary engine.

This not only saves fuel, but also protects environment.

Park Cooler air conditioning systems ensure a pleasant temperature and reduce the humidity of the environment, improving the well-being of the driver in the cabin.

## LUCES LED EN CABINA ULTRA CHATO AERODINÁMICO

## Advantage

- ❄️ 100% Electric Air Conditioning.
- ❄️ Fuel savings
- ❄️ Engine stopped or running operation
- ❄️ Decreases the humidity of the environment
- ❄️ Decreased engine wear due to idling
- ❄️ Eco: Power consumption reduction function
- ❄️ Easy installation
- ❄️ Versatility

Park-C<sup>®</sup>ooler

# RT 35 Agro Max

## Product dimensions and appearance

Condenser: Fiberglass housing

80 cm x 84 cm x 16 cm

Evaporator: 45 cm x 30 cm x 6 cm

Placement mode

In the hatch

**Eco Mode**

Consumption saver (A)

## FEATURES

Use	Night / Day
Compressor	Electric Scroll
Refrigerant Gas	R134a
Oil	POE R68H
Voltage	12V / 24V
BTU	8000
Airflow	560 m3 / h
Air Velocities	3
Battery Protection	Yes
Electric Consumption (12V)	Eco mode: 19-30A Engine Running: 19-39A
Electric Consumption (24V)	Eco mode: 10-20A Motor Running: 10-29A
